

# Why You Should Disable Your Standard Paperclip Attachment and Enable Document GPS

Stand Email Paperclips = Passive, Risky, Final.  
Document GPS = Proactive, Controlled, Revocable.

## Email Attachments: Your Weakest Cyber Link

**91%**

of cyberattacks originate via email, with attachments as the primary vector.

Since 2016, Business Email Compromise (BEC) incidents have cost organizations a staggering

**\$43 Billion**

## Document GPS Gives You Control You Never Had

Once attachments are sent, standard paperclips mean **"GAME OVER."**

**VS**

With Document GPS, you issue blockchain-secured tokens, not files. **Track, edit, restrict, or delete at any time.**

## Real-Time Tracking & Immutable Logs

- See who viewed, downloaded, shared, screenshotted, or even tried to copy in real time
- Immutable audit trails backed by cryptographic hashing = **your Single Source of Truth®**

## Prevent Data Leaks, Ease Compliance & Reduce Carbon Footprint

- Meet global regulations: **HIPAA, GDPR, CIRCIA, DORA, and more.**
- Cut energy waste from email file transfers—move toward a “near-carbon-free email” model.

## Seamless Integration & Widespread Adoption

- Document GPS works inside **Gmail and Outlook, as browser extensions or via mobile app.**
- Now available via **TD SYNEX, Apple, and Microsoft stores.**
- Used in **20+ countries.**

## Trusted & Recognized

Gartner-recognized (2022–2024) in the Hype Cycle

Backed by 28 patents, 29 trademarks (e.g., SSOT®).

Supporting a **\$2.5T** market in cybersecurity, compliance, healthcare, and more
