

Secure. Compliant. Client-Centric.

Document GPS for Law Firms

Document GPS brings next-generation visibility and control to your legal documents—helping law firms protect confidentiality, maintain compliance, and strengthen trust with clients.

Attorney–Client Confidentiality

Protecting client data and privileged communications is a core ethical duty under ABA and state bar rules.

GDPR & State Privacy Laws (e.g. CCPA/CPRA)

Firms working with clients in regulated industries or different regions must safeguard personal information and control how it's shared.

HIPAA

Applies to firms that handle medical or healthcare-related data — requires strict controls and tracking of any shared information.

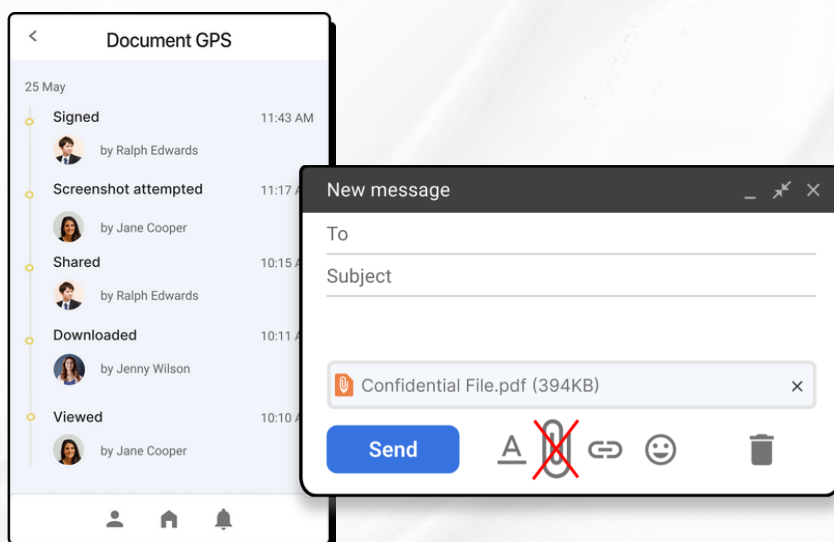

GLBA

For firms representing financial institutions, this ensures proper protection of non-public financial data.

eDiscovery & Record Integrity

Federal and state procedures require firms to maintain full visibility and a clear chain of custody for electronic documents.
